### **DETAILED ACTION**

1. The restriction requirement of paper # 9 is hereby withdrawn and all pending claims are subject to examination.

2. The amendment filed 2-28-01 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: In each of the independent claims, the compressor unit mounted or supported "on the boom" is not shown in the original disclosure. Note that page 12, lines 5-6 states that the air compressor is located "at the base of the deicing boom 82". This is also shown in Figure 8, where the air compressor is located in the "air compressor enclosure" 42, and the base of boom 92 is attached to the compressor enclosure. It is noted that Applicant is attempting to provoke an interference with the Foster patents '092 and '934. During prosecution of these patents, a patentable distinction was drawn between prior art with the compressor located "at the base of the boom" or on the pivoting platform to which the boom is connected. Therefore, the original disclosure of the present application fails to show the compressor placed in the position claimed by the Foster patents and cannot be considered interfering subject matter.

Applicant is required to cancel the new matter in the reply to this Office Action.

3. Claims 90-182 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

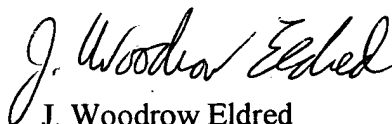

Art Unit: 3644

possession of the claimed invention. In particular, the claimed position of the compressor is not shown in the disclosure, as discussed above.
